

ACGME Survey 2025 – Five Best Practices

Schedule a didactic session for the ACGME Survey **01**

It is critical that residents/fellows take a break from their patient care to focus on this high-stakes survey. Setting aside a didactic time indicates the importance of this survey.

- ### Develop an agenda for the pre-survey education **02**
- 1) Review last year's survey
 - 2) Prepare survey talking points to review key survey terms and program-specific information for each of the content areas

03

Enlist senior residents/fellows to provide pre-survey education

When the leadership conducts the pre-survey education, it can be viewed as "intimidating."

04

Discuss the survey with residents/fellows

In addition to covering your pre-survey education agenda, provide background information and an understanding of the importance of the survey and how the ACGME uses the data.

05 Consider Compliance

70% - Resident/Fellow
70% - Faculty

Since it is vital that those that take the survey also participate in the pre-survey education, be sure that anyone who completes the survey at another time is provided with the same pre-survey education.
